

Life Course Perspective to Child Development

Life Course Perspective to Child Development

Risks to brain development

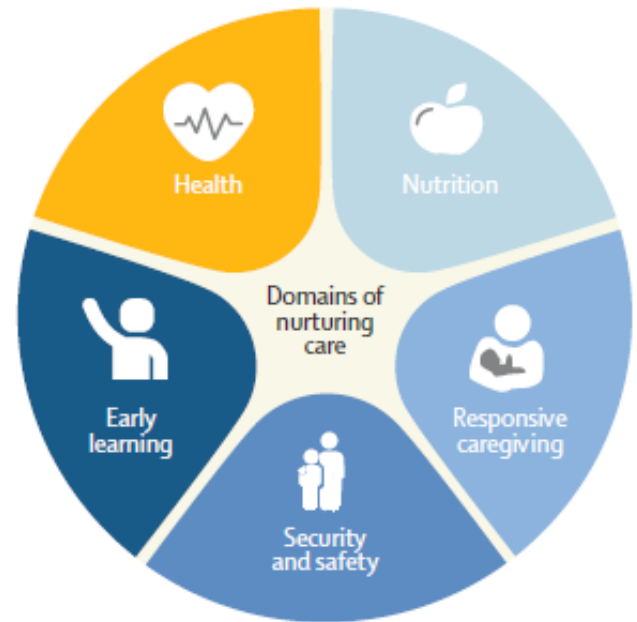

- Individual (preterm birth, stunting, disability)
- Family (poverty, poor caregiving, few learning opportunities)
- Community (unclean and unsafe environments, crime)
- Systems (poor health care, low quality child care)
- Society (conflicts)

Nurturing Care

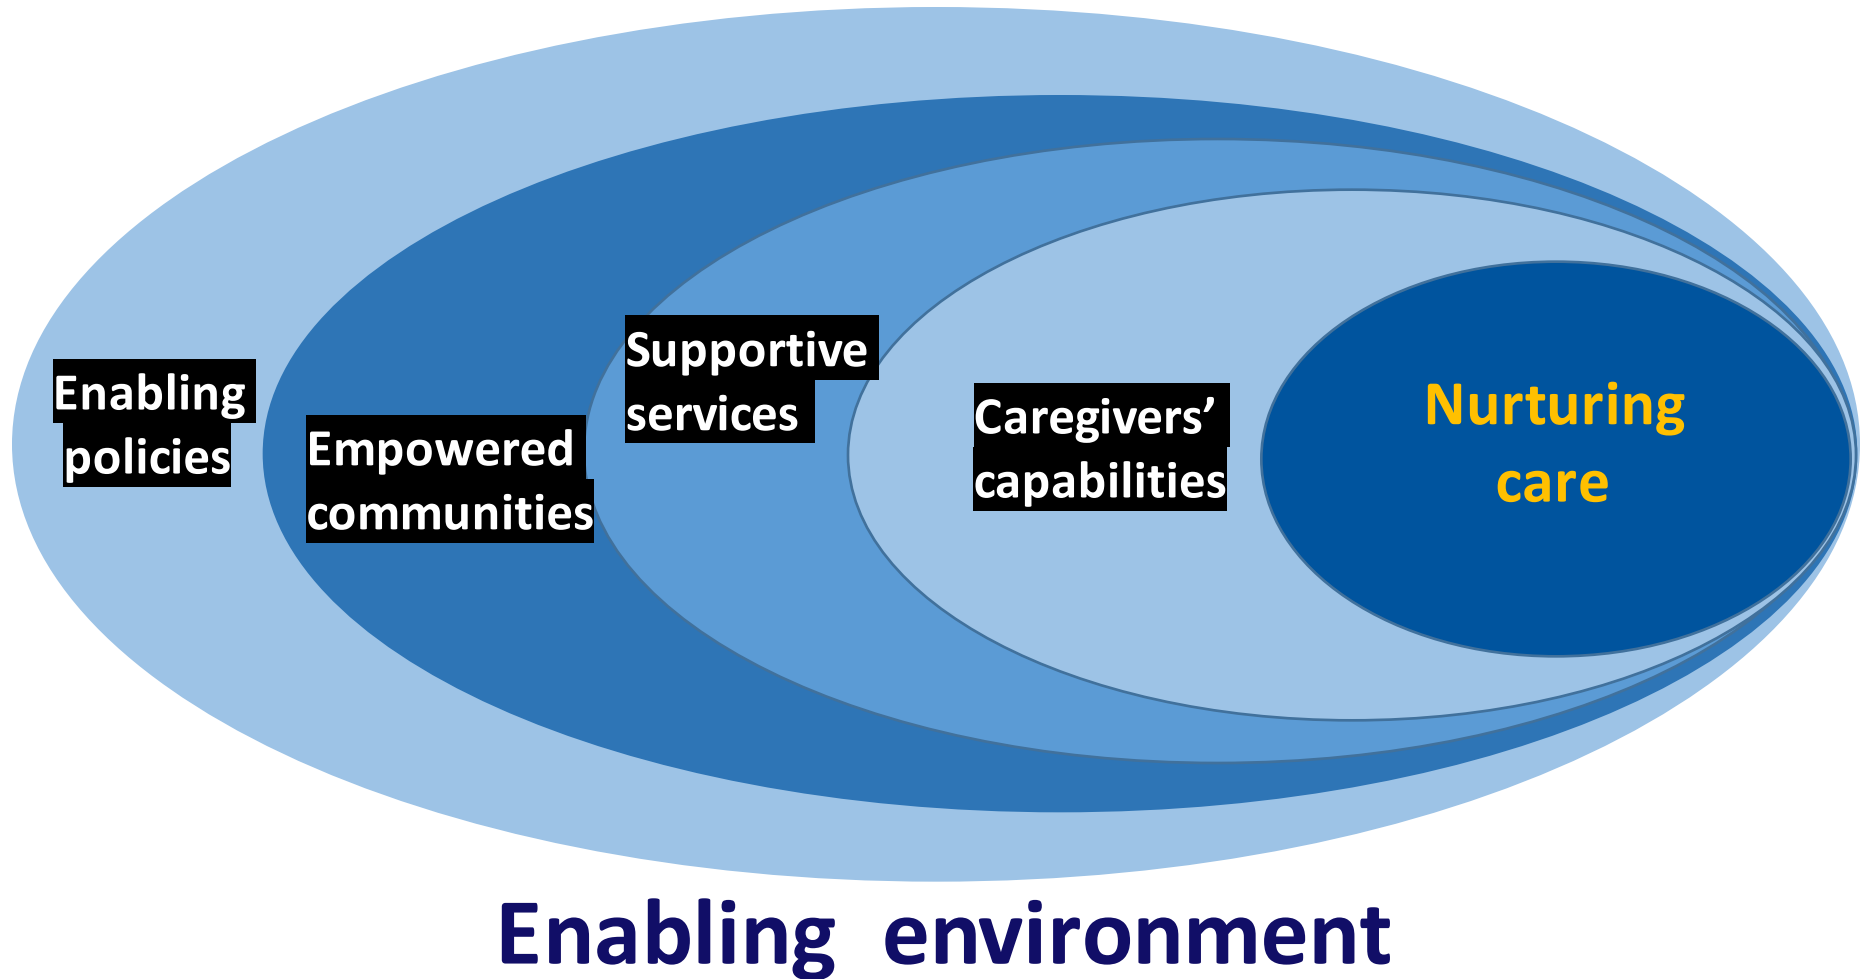

- Nurturing care promotes early child development

- **Difficulty in any single domain impact others.**
- **Each domain is necessary.**
- **No single domain is sufficient.**

Promote Brain Development: Nurturing Care

Begins with health and nutrition interventions

Extends to learning opportunities, responsive caregiving, & protection
